## Profile

Proactive and detail-oriented Full Stack Developer with nearly one year of experience building scalable and responsive web applications using **Angular, NestJS, Java Spring Boot**, and **MongoDB**. Skilled in both front-end and back-end development, REST API integration, and secure authentication. Adept at translating business requirements into interactive, user-friendly solutions. Strong collaborator with a focus on clean architecture, performance optimization, and delivering impactful user experiences.

## Professional Experience

10/2024 – Present
Noida, UP

**Software Developer**
*Mathesis Labs Technology Pvt Ltd*

**Dentistry AI**
**Roles and Responsibilities :**

- Fixed UI and functionality bugs to improve application stability and performance.
- Designed and developed **modular UI components** using Angular Material and Bootstrap.
- Integrated REST APIs for patient records, billing, and dashboard modules.
- Built backend APIs in **NestJS** to support new features and data processing.
- Enhanced existing components by adding features and improving user experience.
- **Development of the mobile app** using **React Native** from scratch — designed complete UI/UX, implemented multiple core functionalities, integrated APIs, and optimized for performance.
- Implemented optimized navigation flows, animations, and state handling for a smooth user experience.
- Used Git for version control, ensuring smooth collaboration and conflict resolution in a multi-developer environment.

## Education

07/2020 – 06/2024
Samalkha, Haryana

**Bachelor of Technology**
*Panipat Institute of Engineering and Technology*

## Skills
