- **Frontend –** Angular, Angular Material, Bootstrap, Responsive Design, Reactive Forms, Routing, RxJS
- **Mobile -** React Native
- **Backend –** NestJS, Spring Boot, REST APIs, JWT Authentication
- **Database –** MongoDB, Mongoose
- **Tools –** Git, GitHub, Postman, IntelliJ IDEA, VS Code, IDEs with Agent

EXPERIENCE

MATHESIS LABS TECHNOLOGY PVT. LTD. | NOIDA, UP

Software Developer

FEB. 2025 – PRESENT

Project: Dentistry AI Platform (Enterprise Healthcare Application)

- Owned end-to-end development of enterprise web and mobile application features across frontend and backend.
- Designed and developed responsive UI screens and reusable Angular components using Angular Material and Bootstrap.
- Built scalable backend APIs and business logic using NestJS and MongoDB.
- Developed and enhanced modules including Patient Management, Billing, Dashboard, Inventory, Reports, Treatment Planning, and Authentication.
- Implemented new business features based on client and product requirements.
- Identified, analyzed, and resolved production issues across frontend, backend, and mobile applications.
- Developed and maintained the React Native mobile application, including UI implementation, API integration, navigation, and state management.
- Optimized application performance and improved overall user experience.
- Used Git for source control, feature branching, code merging, and collaboration.

Software Developer Trainee

OCT. 2024 – JAN. 2025

- Learned project architecture and development workflow.
- Assisted in front-end and backend development.
- Worked with Angular, NestJS, Spring boot and Mongo.

PROJECTS

PROFESSIONAL PROJECTS

Dentistry AI Platform (Enterprise Healthcare Application)

Tech Stack • Angular • NestJS • MongoDB • React Native • Angular Material • Bootstrap

- Developed frontend and backend modules like- billing, dashboard, inventory, patient modules and more.
- Designed new responsive UI screens and added new business features.
- Built and Integrated REST APIs.
- Fixed production bugs.
- Developed React Native mobile application.
- Improved application performance.

PERSONAL PROJECTS

1. FinTrack – Loan Management System

Tech Stack - React Native • NestJS • MongoDB

A finance management application for local financiers to manage customers, loans, EMI schedules, collections, guarantors, and reports with secure authentication.

Features - JWT Authentication • Customer Management • Loan Tracking • EMI Calculation • Dashboard • Payment History

2. AEW Marketplace

Tech Stack - Angular • Spring Boot • MongoDB

An e-commerce platform for buying, selling, and repairing electrical appliances and accessories.

Features - JWT Authentication • Cart • Product Search

EDUCATION

BACHELOR OF TECHNOLOGY (COMPUTER SCIENCE)

Panipat Institute of Engineering and Technology
June 2024
SGPA 7.9
